

CONTAMINATION CONTROL for shoes & wheels

Electronics & Semiconductor

Dycem protects cleanrooms & critical environments within the global **Electronics & Semiconductor** industry.

Our polymeric contamination control mats are proven to attract and retain up to **99.9% of floor level** and up to **75% of airborne particulates**. When installed at pedestrian and wheeled entrances to a controlled space or clean room, the risk of potentially harmful contaminants like dust and ESD entering your critical environment is prevented. Protecting your work, your products, and your people is our top priority!

The Dycem Difference

Improved Contamination Control

SUPERIOR PERFORMANCE in attracting, collecting, and retaining particles

ESD PREVENTION through static dissipative properties

EFFICIENCY by requiring no extra training, processes, or additional time for use

QUALITY & COMPLIANCE commitment by meeting industry and international standards

CUSTOMIZED SOLUTIONS tailored to meet the needs of each facility and provide optimal results

EASY CLEANING routine incorporated into existing SOP's with minimal downtime

SUSTAINABILITY and significant reduction in waste over a 3+ year lifespan

“Since replacing peel-off mats we have seen a noticeable improvement in static charge within the labs and surrounding areas... a much more effective method of prevention.”

-Infineon

OUR PRODUCTS FOR YOUR INDUSTRY

CleanZone

For pedestrian shoes & light wheeled traffic

Color options

Cobalt Titanium Midnight Slate Green Red

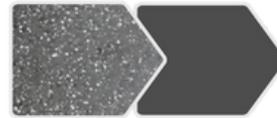

WorkZone

For wheels of heavy carts, pallet jacks, & forklift traffic

Color options

Granite Charcoal

“

“We invested in Dycem some five years ago to protect our critical environments i.e. cleanrooms and camera assembly...we have now built new cleanrooms and improved the cleanliness of our controlled areas. The improvement in those areas is very much down to the Dycem product.”
